

Russia Sanctions: Price Caps On Crude Oil And Petroleum Products

Last updated: April 3, 2023

For the ACAMS infographic on the crude oil and petroleum products subject to the G7/EU/Australia price caps, please visit [ACAMS' Ukraine Crisis Rapid Response Resources page](#)

On Sep 2, 2022, G7 finance ministers meeting in Berlin announced a joint political intention to finalize and implement a comprehensive prohibition of services which enable the maritime transportation of Russian-origin crude oil and petroleum products globally, in response to Russia's illegal and aggressive war against Ukraine. This led to the establishment of the so-called **Oil Price Cap Coalition** which is composed of **Australia, Canada, the European Union, France, Germany, Italy, Japan, the United Kingdom**, and the **United States**.

On Dec 8, 2022 and Dec 16, 2022, respectively, the governments of **Norway** and **Switzerland** made public their intention to adhere to the Oil Price Cap policy. However, neither country has formally joined the Coalition.

						
Price caps	<p>Crude oil: \$60/barrel Oil products: \$45/barrel for products trading at a discount* to crude oil \$100/barrel for products trading at a premium** to crude oil</p>
